DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 20-23 and 27, drawn to a carrier system with a specific crossbar gripping structure, classified in class 83, subclass 409.
 - II. Claims 20 and 24-26, drawn to a carrier system with a specific crossbar rotating structure, classified in class 83, subclass 436.3.
2. Claims 20-27 have been restricted such that the patentability of the invention is presumed to lie in the details of the particular group (e.g. the specific crossbar gripping structure of Group I). It is noted that if claim 20 as originally filed is part of an elected group and determined to be patentable, rejoinder of claims 20-27 will be considered. It is further noted that claim 20 is listed as part of both groups but is not considered to be part of either of these groups. Rather, claim 20 recites subject matter that is common to both groups and has been shown as part of each group for clarity (i.e., so that it is clear which claims are part of which group). Further, because claim 20 includes subject matter which is common to both groups, it is not considered to be independent or distinct from either of the groups and thus will be examined with the elected group.

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions of groups I and II are separate inventions. They are distinct because the invention of group I does not require the specific details of the crossbar rotating structure of group II for patentability as evidenced by the omission thereof from group I, and the invention of group II does not require the specific details of the crossbar gripping structure of group I for patentability as evidenced by the omission thereof from group II.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
